Wireless Water Security System

Patent 5,881,755 and 8,201,574-

## The World's Best Water Security System

Designed for Single or Multi Family Housing

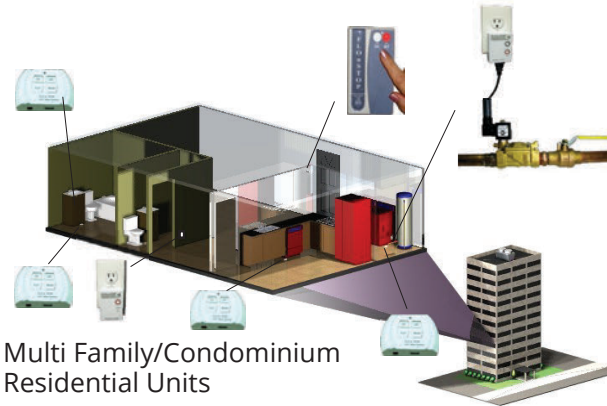

- Helps prevent water damage from ruptured household water supply lines.
- Water is turned ON or OFF with a touch of a button from a convenient location.
- Wireless operation, easy to install. No hardwires to run.
- 24/7 Water Sentinel Floor Sensor with alarm is always on guard, day and night.
- Up to 16 different wireless code system available for single family. Model No. 22948
- Up to 256 different wireless code system available for Condo Installations. Model #22949
- 110-120VAC  
1" Lead Free Brass Solenoid Valve
- Built in Manual Override

## Convenience and Security

is assured with the knowledge that your dwelling is protected against accidental water damage from broken water pipes, faulty water appliances, earth tremors, and frozen, then thawed water lines.

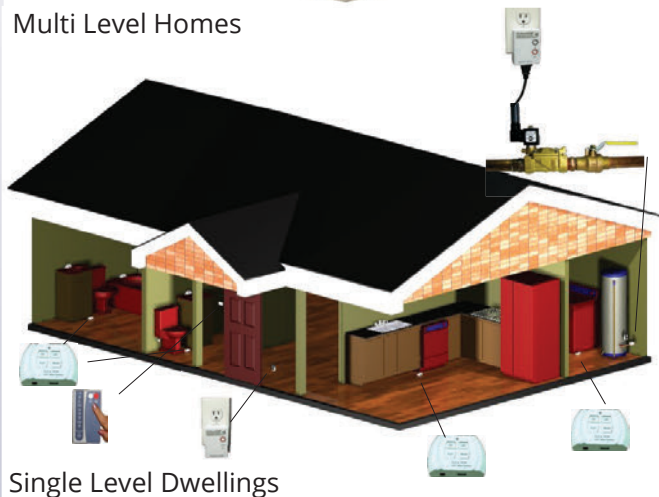

### Total Home Water Protection With Easy Plug-in Components

Multi Family/Condominium Residential Units

Multi Level Homes

Single Level Dwellings

### How it Works:

For Pro Active and Convenient operation, the wireless Transmitter Button Pad is located at the most used Exit/Entry point allowing you to turn the water OFF or ON to the entire home.

With a Push of the ON/OFF button, a coded wireless signal is sent to the module.

The module controls the ON/OFF function of the Solenoid Valve.

1" Lead Free Brass Solenoid Valve with Manual Override (120VAC)

The Solenoid Valve is installed into the water supply line after the main shut-off valve.\* It is then plugged into the base of the module.

The 24/7 Water Sentinel floor sensor is placed on the floor in every area there is a water appliance.

If water comes in contact with the floor sensor, the Sentinel sounds an alarm and transmits a coded wireless signal to effect the SHUT-OFF of the Solenoid Valve that supplies water to the

\*Valve installation should be done by a licensed plumber.
